Professional Experience

- 2015– **Data Scientist, Rakuten Inc., RIT., Tokyo, Japan.**
Obligations: Working on semantic information extraction from semi-structured data and free text for Rakuten Ichiba and PriceMinister. In addition, I am working on market segmentation, and stock market analysis.

The -ontop- system is used for: (i) query-answering SPARQL queries over large relational databases; (ii) check consistency of the data w.r.t. the constraints in the ontology; (iii) virtual data integration; and (iv) Ontology-Based Data Access (OBDA).
See <http://ontop.inf.unibz.it>.
Obligations: Leading the Ontop project, use case modeling (OWL/R2RML mapping language), providing logical foundations to different aspects of OBDA, contributing to the implementation and testing of -ontop-.
Software Development: Java.
